

ATP Gov and Telos Join Forces to Strengthen and Secure Global Satellite Communications

July 26, 2023

New opportunity supports U.S. Air Force expeditionary efforts with Airbus Ranger Terminal solution

ASHBURN, Va., July 26, 2023 (GLOBE NEWSWIRE) -- [ATP Gov](#), a leading provider of information technology solutions for the federal government, alongside [Telos Corporation](#) (NASDAQ: TLS), a leading provider of cyber, cloud and enterprise security solutions for the world's most security-conscious organizations, celebrate a new delivery order with the U.S. Air Force to provide global satellite communications solutions across austere environments.

Together, ATP Gov and Telos will deliver the Airbus Ranger Terminal — a compact, scalable smallSATCOM Terminal solution that meets the stringent air transport size restrictions and provides critical reach back services for U.S. Air Force expeditionary forces in terms of capabilities, compatibility with other SATCOM Terminal components, standardized SATCOM operations and maintenance training, and sustainability.

"It's an honor to help deliver such critical functionalities to the U.S. Air Force," said Marianne Samborski, president of ATP Gov. "Their mission is our mission, and we are committed to using our team's extensive technical expertise to help them achieve it."

Working collaboratively, ATP Gov provides holistic program management support as the prime contractor, while Telos leads cybersecurity efforts to secure the system and provides expertise to develop technical orders.

"We're pleased to team with ATP Gov to arm the U.S. Air Force with the technical expertise and security solutions it needs for the success of its satellite communications program," said John B. Wood, chairman and CEO, Telos.

Telos has been providing solutions to various offices within the Air Force Life Cycle Management Center (AFLCMC) for over a decade, and more specifically to the AFLCMC Theater Deployable Communications (TDC) Program Management Office (PMO) for the last three years. Telos' recent TDC PMO deliveries include the [TDC Black Core](#) Architecture and TDC Network Control Center – Deployed (NCC-D) Flex Uninterruptible Power Supply (UPS) programs.
