Telos Corporation Expands Cyber Risk Management Support for the National Archives and Records Administration

September 8, 2026

NARA selects FedRAMP High-authorized Xacta 360 and Xacta.ai to advance cyber risk and compliance management.

ASHBURN, Va., Sept. 08, 2026 (GLOBE NEWSWIRE) -- Telos Corporation (NASDAQ: TLS), a leading provider of cyber, cloud and enterprise security solutions for the world's most security-conscious organizations, today announced a contract award expanding its work with the National Archives and Records Administration (NARA) through the deployment of its FedRAMP Class D (High)-authorized Xacta® software-as-a-service (SaaS) offering.

Under the contract, NARA will use Xacta 360™ and Xacta.ai™ to enhance its cyber governance, risk and compliance (GRC) activities in a secure cloud environment. Xacta 360 will provide an integrated solution for managing security authorization workflows, control assessments, compliance documentation and continuous monitoring, while Xacta.ai will apply AI-powered analysis and automation to reduce manual effort and generate actionable risk and compliance insights.

"This award expands our relationship with NARA and reflects the agency's continued confidence in Xacta," said John B. Wood, chairman and chief executive officer, Telos. "AI can be a powerful catalyst for technology modernization – helping federal agencies reduce manual effort, uncover insights faster and make more informed risk decisions. By delivering AI-powered analysis and automation within a secure FedRAMP Class D-authorized SaaS environment, Xacta will help NARA modernize how it manages cybersecurity risk and compliance."

NARA is responsible for preserving and providing public access to the permanent records of the federal government, while also overseeing federal records management. The agency's expanded use of Xacta will support its ability to manage cyber risk and compliance across the technology environments that enable this important public mission.

Xacta is Telos' cyber GRC platform, designed to help organizations manage cybersecurity risk and compliance across complex enterprise environments. Its integrated capabilities support security authorization, continuous monitoring and AI-assisted risk analysis, enabling organizations to improve visibility, make informed decisions and maintain ongoing awareness of their security and compliance posture.

The full Xacta platform is authorized at the FedRAMP Class D (High) impact level, the program's highest security baseline. This authorization enables federal agencies to deploy Xacta's SaaS capabilities in environments that handle sensitive unclassified information through a standardized, government-wide approach to cloud security assessment and authorization.

Forward-Looking Statements
This press release contains forward-looking statements which are made under the safe harbor provisions of the federal securities laws. These statements are based on the Company's management's current beliefs, expectations and assumptions about future events, conditions and results and on information currently available to them. By their nature, forward-looking statements involve risks and uncertainties because they relate to events and depend on circumstances that may or may not occur in the future. The Company believes that these risks and uncertainties include, but are not limited to, those described under the captions "Risk Factors" and "Management's Discussion and Analysis of Financial Condition and Results of Operations" set forth from time to time in the Company's filings and reports with the U.S. Securities and Exchange Commission (SEC), including its Annual Report on Form 10-K for the year ended December 31, 2025, as well as subsequent and future filings and reports by the Company, copies of which are available at https://investors.telos.com and on the SEC's website at www.sec.gov.

Although the Company bases these forward-looking statements on assumptions that its management believes are reasonable when made, the Company cautions the reader that forward-looking statements are not guarantees of future performance and that the Company's actual results of operations, financial condition and liquidity, solution and contract performance, and industry developments, may differ materially from statements made in or suggested by the forward-looking statements contained in this release. Given these risks, uncertainties and other factors, many of which are beyond its control, the Company cautions the reader not to place undue reliance on these forward-looking statements. Any forward-looking statement speaks only as of the date of such statement and, except as required by law, the Company undertakes no obligation to update any forward-looking statement publicly, or to revise any forward-looking statement to reflect events or developments occurring after the date of the statement, even if new information becomes available in the future. Comparisons of results for current and any prior periods are not intended to express any future trends or indications of future performance, unless specifically expressed as such, and should only be viewed as historical data.
