Charlotte Douglas International Airport Selects Telos to Process Background Checks for Aviation Workers

April 20, 2021

Telos' aviation channeling services offer increased efficiency and flexibility in credentialing operations at one of the ten busiest airports in the world.

ASHBURN, Va., April 20, 2021 (GLOBE NEWSWIRE) -- Telos ® Corporation (NASDAQ: TLS), a leading provider of cyber, cloud and enterprise security solutions for the world's most security-conscious organizations, today announced that the City of Charlotte has contracted with Telos to provide Transportation Security Administration (TSA)-approved Designated Aviation Channeling (DAC) services for processing worker background checks at Charlotte Douglas International Airport (CLT).

Telos' DAC services improve data integrity, increase the efficiency of credentialing operations and reduce costs. DAC services enable submissions of workers' biographic and biometric data to conduct background checks for individuals working in secure areas of U.S. commercial airports.

"The DAC services deployment at Charlotte Douglas International Airport is notable for its integration with CLT's Identity Management System, enabling efficient biographic and biometric transmissions," said Dawn E. Lucini, vice president of aviation security, Telos. "We have streamlined the TSA-required aviation worker background check process, while upholding the high security and customer service standards at CLT."

As an encrypted, web-based solution, Telos' DAC services meet TSA and Department of Homeland Security (DHS) requirements for handling personally identifiable information and biometrics. The modular design supports each airport's and air carrier's needs, and users can perform multiple functions on one platform.

"Telos is the recognized leader in assuring the identities of aviation workers with advanced biometric and enrollment solutions, evidenced by the growing roster of airports and airlines – 90 and counting – that currently use Telos DAC services," said Lucini. "We are pleased to support the City of Charlotte and its world-class airport in their efforts to provide excellence in credentialing and vetting services, all while reducing costs and providing superior customer care and flexibility."

In February 2021, Telos also added Fresno Yosemite International Airport (FAT) to their customer list. FAT is the primary commercial airport serving the San Joaquin Valley and three national parks: Yosemite, Sequoia, and Kings Canyon.
